

## Company Profile

Cargo Safe Indonesia was established in 2007. The Founder bought the technology all over from Sweden. Our company committed to provide high quality container desiccant product and advanced moisture control application solutions for our customers all over the world. With our research & development team, specialized in container desiccants as well as white silica gel. Professional equipments, high qualified management teams and experienced technical staffs to provide unique and cost effective solutions to today's moisture problem. **CSxtra** series based on Calcium Chloride, Starch and other ingredients all import from overseas to ensure the quality and smooth production flow. We have a mature market for both in the domestic and overseas and has been famous in container desiccant all over the region.

**CSxtra** series not only has good formula absorption in the desiccants, but we can control the humidity in the container within 60%-70% of the environment and can be up to 60 days long. The product also passed ISO9001:2015 and tested by SGS. With the advanced laboratories, now **CSxtra** has become one of the most comprehensive moisture solution series base in Indonesia.

Our product is developed through extensive research and development in our lap and also in cooperation with reputable university. We also registered our intellectual property rights through formal channel, to ensure legal protection of our trade marks, products design, and invention patent.
